

# UNIT 4 Module 1 Wrap-up: Complete a Loan Analysis

## Complete a Loan Analysis

Now you have seen why it's helpful to be able to complete a loan analysis. Sometimes you will have to make business decisions and to make the best decisions, you will have to make informed predictions based on data. As you have seen, you will want to consider different variables and scenarios. In this module, you used Excel to answer critical predictive analysis questions regarding loans. You created an amortization schedule, which is a table that shows you every periodic payment on a loan. You completed part one of your unit project, and you accessed a workbook that allowed you to follow along with Professor Haeger as she demonstrated using Excel to solve predictive problems.
