In 1-2 pages, reflect on the question: How did the local context/schooling environment impact your educational experience in K-12?

- First, describe your schooling environment and local context. For example: student/community demographics; geography/location; religious communities?; local political scene; state/national politics/makeup
- Then, critically reflect on your schooling experience in relation to the “norms” of your school-community. How did the local makeup of your community shape your learning context?
