

TOOL

Power and Stakeholders

List all stakeholders in each of the four categories: community partners, faculty, students, and higher-education institution. Err on the side of including too many rather than too few people who have both direct and indirect interests and involvement.

Stakeholder Categories	Direct Who will be directly involved; for example, by interviewing, providing data, leading a project team, or benefiting directly from program outcomes?	Indirect Who has an interest in the outcomes without being directly involved; for example, by providing project funding or using the research?
Community partners
