UNIT 4 Module 2 Wrap-up: Use Forecasting and Predictive Analytics

Forecasting and Predictive Analytics

In this module, you gained practical experience using Excel to make informed decisions. You examined the powerful functions that Excel offers you in forecasting and predictive analytics. You practiced using Excel to work with different variable inputs and accurately predict the resulting outcomes. You examined three critical Excel functions to see how you can use them in your daily work. You participated in a discussion with your peers regarding how forecasting and predictive analytics are useful, and you completed part two of your course project.
